FOR IMMEDIATE RELEASE

Morbark Integrates Key Elements into ConExpo Booth Products, Technology, Support and Partnerships to be Highlighted

Winn, Michigan (December 12, 2007) – Offering a first-hand look at the industry's most advanced grinders, as well as the opportunity to explore important components of the company, Morbark's booth will be on the itinerary of everyone involved in wood waste processing.

Equipment on display will include the re-designed 1300B Track Tub Grinder. The best selling tub grinder in history, this rugged, efficient machine has been further enhanced by a recent series of improvements. If horizontal grinders are of interest, the mega-productive 4600XL Track Wood Hog and the new 3800 Wood Hog are two more compelling reasons to visit the Morbark booth. All machines offer Morbark's trademark heavy construction along with the latest technology, including digital feed and monitoring systems.

Enhancing this impressive display of equipment, Morbark will be showcasing a variety of key elements behind the machines. Individual pavilions will focus on product technology, parts and service support, Morbark partners, dealers and customers. The Morbark booth will be located in the Silver Lot, #618. For more information please call 1-800-831-0042 or visit the website at www.morbark.com.
